### ABOUT ME

I'm a full stack developer, focusing on Ruby on Rails and the JavaScript MERN Stack. I recently completed a 6 month intensive bootcamp with High Distinction at CoderAcademy in Melbourne where I was the Women in Tech Scholarship recipient.

Currently based in Melbourne, Australia.

Other than coding, I am passionate about people, cheering on Daniel Ricciardo in F1, tending to my herb garden, and I have regular cravings for French Toast or a crispy pork Bahn Mi. Fortunately, I also cannot go without being active every day, be it running, pilates or yoga.

The spectacle before us was indeed sublime.

Apparently we had reached a great height in the atmosphere, for the sky was a dead black, and the stars had ceased to twinkle. By the same illusion which lifts the horizon of the sea to the level of the spectator on a hillside, the sable cloud beneath was dished out, and the car seemed to float in the middle of an immense dark sphere, whose upper half was strewn with silver. Looking down into the dark gulf below, I could see a ruddy light streaming through a rift in the clouds.
